The official Nintendo DS / GBA emulator. from sdx11-plugin: Developers of the GSDX11 GSDx Plugin for Reduction of serum cholesterol in children with non-insulin dependent diabetes mellitus: a two-year study. The effect of diet on serum cholesterol levels was investigated in 57 children with non-insulin dependent diabetes mellitus. The children were randomized into two equal groups: group A received a moderate energy diet (35% protein, 30% fat, 35% carbohydrate) and group B received a high energy diet (40% protein, 30% fat, 30% carbohydrate). At the end of 24 months of treatment, in group A, the serum cholesterol level was less than the age-matched control values in 36 of 37 children, and serum triglycerides were also significantly reduced. In group B, only 6 of 20 children had serum cholesterol values below the age-matched control value, and the triglycerides were reduced. In the children of both groups, there was no correlation between degree of glycaemic control and serum cholesterol level. These findings suggest that in children with non-insulin dependent diabetes mellitus, a diet adequate in energy intake and containing carbohydrate in
